## 1. Introduction

This document, Register of Public Roads (the Register), is made in accordance with Section 19(1) of the Road Management Act 2004 (the Act). The Register forms part of the Road Management Plan (the RMP) which is made in accordance with Division 5 of the Act. The Register provides the following information for roads located in the municipality:

- Public roads in respect of which City of Whittlesea (the Council) is the Coordinating Road Authority.
- Arterial roads in respect of which VicRoads is the Coordinating Road Authority.
- Road management arrangements made with neighboring municipal Councils and any designated road project.
- Road management clarification – public roads, non-public roads, and structures in respect of which the Council seeks to clarify the road management responsibility.
- Melbourne Water Corporation structures (e.g. bridge or culvert over aqueduct) which form part of public roads, in respect of which the Council and Melbourne Water Corporation have separate road management responsibilities.
- Ancillary areas to a public road in respect of which the Council is the Coordinating Road Authority.
- Discontinuance of Roads
- Pathway (footpath, bicycle path and shared path) which have been classified with Pathway Hierarchy 1 and 2.
- Private roads in respect of which a body such as a body corporate, university, company, and the like, is responsible to ensure the private road is safe for its users.

If a road does not appear on the Register, it is deemed that the City of Whittlesea is not responsible for that road including its road-related infrastructure.

The data of the Register is current as at 30 June 2020, and it will be updated every six months approximately. A copy of the Register can be downloaded from the Internet site of the City of Whittlesea, [www.whittlesea.vic.gov.au](http://www.whittlesea.vic.gov.au). ## 2. Public Roads

A list of public roads in respect of which City of Whittlesea is the Coordinating Road Authority is outlined in **Attachment 1**.

The list is from data extracted from Assetic Asset Management Software, which is Council's asset information system for road infrastructure. Roads are broken down into road segments to help the management of operation, construction, inspection, maintenance, repair, renewal, condition assessment and valuation of road infrastructure.

The data contained in Attachment 1 should be read in conjunction with the following Table 2 – Road Hierarchy.

<b>Table 2. Road Hierarchy</b>		
<b>Co-ordinating Road Authority</b>	<b>Road Type</b>	<b>Road Hierarchy</b>
<b>VicRoads</b>	<b>Freeways</b>	Please refer to VicRoads' Road Management Plan and Register of Public Roads
	<b>Arterial roads</b>	
<b>City of Whittlesea</b>	<b>Public roads</b>	Link road
		Collector road
		Access road

In addition to the roadway of a public road, the City of Whittlesea is also responsible for road infrastructure and road-related infrastructure forming part of a public road. For example, bridge, culvert, traffic control device, roundabout, traffic island, drainage, road signs, street signs, roadside vegetation, pathway, and ancillary area of a public road.

### 3. Arterial Roads

A list of arterial roads in respect of which VicRoads is the Coordinating Road Authority is summarised in **Table 3** below. The list is from data from VicRoads' Register of Public Roads. Please refer to VicRoads' Register of Public Roads for the latest update.

With respect to the roadside of arterial roads, the City of Whittlesea is the Responsible Road Authority to the physical limits set out in the Code of Practice for Operational Responsibility for Public Roads published by the Minister.

With respect to the roadway of arterial roads, currently City of Whittlesea is a maintenance service provider to VicRoads.

## 4. Road Management Arrangements

### 4.1 Arrangements with other Authorities

The City of Whittlesea has made arrangements for the transfer of road management functions in respect of the public roads listed in Table 4. The arrangements were made in accordance with Section 15 of the Act.

<b>Table 4 Road Management Arrangements</b>			
<b>Road Name Suburb</b>	<b>Road Section Description</b>	<b>Authority</b>	<b>Reference Document</b>
Summerhill Road, Wollert / Craigieburn	Road bridge over Merri Creek at municipal boundary.	City of Hume	Memorandum of Understanding 5 Feb 2010

Please refer to the Schedules attached to the Section 15(1) Boundary Roads Arrangement dated 8 Aug 2011		Department of Environment, Land, Water and Planning	Section 15(1) Boundary Roads Arrangement 8 Aug 2011

Please also refer to Table 5.1 Road Management Clarification, for the effects of the arrangements on the affected roads.

### 4.2 Section 16 Designated Road Project

No road project, located within the municipality, has been determined a 'designated road project' by the Minister under the provision of Section 16 of the Act.

### 4.3 Section 22 Ministers Directions

No direction has been received from the Minister or a relevant road Minister under the provision of Section 22 of the Act.

## 5. Clarification of Road Management Functions

### 5.1 Public Roads, Non-Public Roads and Fire Access

A 'not used' government road is defined as land (also referred as 'not used Crown road reserve') that has been officially set aside for public traffic, now or in the future, but never constructed or used.

Note: 'Unused road' means a road declared as unused in accordance with Section 400 of Land Act 1958. When a road is 'not used' as a road but has not been declared as unused under Section 400 of Land Act 1958, it is described as 'not used'.

In relation to 'not used' government road, it is only upon a roadway has been built in such road reserve, and that roadway is considered by Council to be reasonably required for public use, then the Council would maintain the road as a public road. City of Whittlesea is responsible for the land management of an 'not used' government road except when it has been licensed for agricultural use or other approved uses; for example, Avelin Road Donnybrook, and Wells Road Thomastown.

In relation to the licensing of 'not used' government road for agricultural use or other approved uses, please refer to Department of Environment, Land, Water and Planning (DELWP) for the details, terms and conditions of the lease.

In relation to road infrastructure assets managed or controlled by Responsible Authority such as Melbourne Water, DELWP, Parks Victoria, VicRoads, AusNet Services (formerly SP Ausnet), please refer to the relevant Authority for further details.

Unless otherwise arranged, all made or unmade roads and tracks including structures:–

- Located within the State Forest would be the responsibility of Department of Environment, Land, Water and Planning (DELWP) and/or Parks Victoria.
- Located within the Yan Yean Catchment and Toorourrong Catchment would be the responsibility of Melbourne Water Corporation.
- Located within the private land and vacant private land would be the responsibility of the owner/occupier of that private land.
- Located within the public land would be the responsibility of the owner/occupier of that public land.
- Fire Access Tracks would be the responsibility of the Responsible Authority listed in Table 5.1. Upon request to the City of Whittlesea, the Council may help provide basic grading maintenance to Fire Access Track, for the respective Responsible

Authority.

The following **Table 5.1** is a summary list of public roads, non-public roads, and Fire Access Tracks, in respect of which the Council seeks to clarify the road management functions and responsibilities. Where the Responsible Authority is not just City of Whittlesea, please also refer to Table 4, Road Management Arrangements, for more details.

## 5.2 Structures of Melbourne Water Corporation

A list of structures (bridges or culverts over the aqueduct) forming part of public roads in respect of which both the Council and Melbourne Water Corporation (MWC) have road management functions, is outlined in Table 5.2 below.

For the public roads listed in Table 5.2, the management responsibilities are –

In relation to the road assets which are constructed over and above a MWC structure (e.g. bridge or culvert over an aqueduct); City of Whittlesea has the management responsibility for those road assets. This includes the construction, inspection, maintenance and repairs of road pavement, road seal, lane markers, line marking, road signs, and approach guard railing.

In relation to the MWC structure (e.g. bridge or culvert over an aqueduct); Melbourne Water has the management responsibility for that structure. This includes the construction, inspection, maintenance and repairs of the foundation, substructure, piers, embankments, bridge bearings, superstructure, decking, expansion joints, posts and railings on the structure.
